

# MeylandDiscover®

## Movement and Play

The pattern of movement of small children develops gradually and learning to crawl is a natural stage in this process.

Children learn and perceive their surroundings through the body and its senses. The physical activity of the child helps to make it secure in its own body and therefore it is important that the child is helped and motivated to start crawling.

## Independence

The child is helped into meylan*Discover* and placed with the sling support under the chest/stomach.

Meylan*Discover* arouses the child to start crawling and strengthens the musculature of the arms and legs. This is a help to the child in several situations and furthermore it helps to promote the development of the child's motoric skills, which will strengthen the communication, social interaction, play and learning.

## Curiosity

With its simplicity of design and fascinating colour meylan*Discover* is an appealing aid that rouses the curiosity of the child and motivates it to crawl and develop.
